

Snap in Cable Management Finger Kit

Data Solutions

The hand mountable cable fingers ensure an optimal cable radius and prevent damage or breakage by ensuring an appropriate cable bend radius. The flexible T shaped structures protect the cables so that the structured cabling system remains undamaged and fully functional.

FUNKTIONER

T-shaped cable fingers installable directly on the 19" panel mounts without screws allow for easy and clean management of copper and fiber optic cables, etc.

Each 5-Finger unit can be individually snapped on to the 19" upright based on the cable management requirements

The cable fingers protrude 81,5mm from the 19" upright, hence needs a minimum recess of ~82mm

Finger spacing of 36,45mm for high density cabling

Works only with Datacom 19" uprights / panel mounts with printed U Height identification - 24630013, 24630014 and 24630015
