Subject: Clarification on Enclosure Model Numbers in UL Product iQ®

Dear Pang Gubler:

You recently asked why enclosure model numbers do not appear on your UL Product iQ® (<https://iq.ulprospector.com/>). Your File E81997 is covered under the category for Industrial Control Panels, UL Category Control Number (CCN) NITW. This category also covers Industrial Control Panel Enclosures and is classified as a Type L category.

Products covered under Type L categories are not required to be marked with a model, catalog or part number unlike those under Type R categories (Type R service covers many Listed products and all Recognized Components (like yours covered under NITW2). As a result, model numbers are not required to appear in UL Product iQ®, which is UL Solutions' online certification database.

Zonex series enclosures, Cat No. ATEX or EXE; followed by height, A, width, B, and depth, C; followed by SS6, SS or MS; and followed by no digit, 1, 2, 3, or 4 rated 4, 4X, 12 are included in this category.

It is important to note that the presence of the UL Listing Mark on the product is evidence that it is Listed. The appearance of a model number in the UL Product iQ® is not a substitute for UL mark.

Your business is very important to us and if there is any additional information that we may provide to you about the investigation or UL's other services, please do not hesitate to contact us.

Sincerely,
