

nVent CADDY WBT Performance Cable Tray PreForm

Features Guide

PRECISE MATERIAL SELECTION

- Steel bottom for aesthetic finish
- Flame retardant polymer rails

SNAP-IN RAILS

- Tool-free installation, requiring no cutting or configuring
- Provides clean radius bend
- Avoids sharp protrusions and protects cables

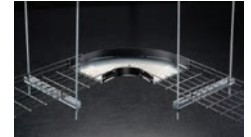

CABLE TRAY TRANSITIONS

nVent CADDY WBT Performance Cable Tray Transitions with PreForm offer a clean, fast and uniform engineered solution for pathway bends, tees and intersections. Labor cost and time can be reduced by up to 60% compared to traditional methods – helping to maintain flexibility and cost-effectiveness in any tray pathway retrofit.

Elbow 90°:

- Routes cable systems in one direction

Tee:

- Routes cable systems in two directions

Intersection:

- Routes cable systems in multiple directions
