CADDY

SHAPED TRAY

01

Shaped Tray

Shaped tray means more support for your cabling. Independently verified and tested more support. Like 400% more support and decreased cable strain averaging 63%. Put your expensive cabling in a better home.

PREFORM

02

PreForm

So, you're not into saving 70% to 90% on installation time, and providing a better looking more uniform and engineered pathway? Don't install tray the 'old fashioned' way. It's PreForm or old form.

GREEN

03

Green

nVent CADDY WBT Performance Cable Tray strives to utilize 100% domestic recycled steel content in all our tray offerings. We can even potentially help with LEED credits.

NOSPLICE

04

NoSplice

NoSplice Ceiling and Center supports pull double duty, and act as a pathway support and splice point. Installation savings... up to 93%. UL Classified and no widgets or acrobatic maneuvering of the tray required.

05

Domestic Production & Leadtimes

nVent CADDY WBT Performance Cable Tray has the largest manufacturing capacity with the widest tray widths of any domestic supplier. Our tray and support products are made in the good ol' USA, not shipped on containers from overseas. Leadtimes are measured in days, not weeks. Why should you have to wait and wait for delivery?

FORM

06

Form

nVent CADDY WBT Performance Cable Tray introduced the concept of flame retardant polymer liner in tray. Form is used to disguise the contents of the pathway. Available in bottom or bottom/sides configuration. We stock in black, white and yellow and offer an infinite number of custom colors and finishes. Go cool with a carbon fiber insert or faux marble. Limitless design options.

07

Limitless Tray Finishes

More and more, tray is being used as a design element. nVent CADDY WBT Performance Cable Tray Architectural Series is where art meets function. Whether you're color coding pathways or matching a brand's identity, you can release your inner designer. Plus, with the 'other guys' field time is wasted removing paint at each splice point in order to properly bond and ground trays. With Performance Cable Tray there's no field removal of paint.

T

We provide a T-weld on each and every standard tray that leaves our manufacturing floor. Our competitors often skip this step creating a messy finished look that is less safe to work with over time.

NEW & NEWER

09

New & Newer

Our complete line of datacom solutions gives you confidence that the job will be done right the first time and that you have a partner continuing to innovate and lead the industry. That's why it's called nVent CADDY WBT Performance Cable Tray.

SERVICE 10

Service

When it comes to service, support and relationships ... we're as old school as they come. We supply innovative products with world class service.
